

CORPORATE OVERVIEW

WHO WE ARE

Spry Methods, Inc. (Spry) is a small business delivering cybersecurity, IT modernization, data, and mission support solutions to Federal Civilian, Defense, Intelligence, and law enforcement customers. Founded in 2001 and headquartered in McLean, Virginia, Spry supports high-consequence missions where security, speed, and operational rigor matter. A Top Secret Facility Clearance, personnel cleared at all levels, and ISO-certified, CMMI Level 3-appraised processes let Spry staff sensitive work without waiting on clearance processing and hold quality steady across teams and task orders. Our identity is rooted in integrity, technical excellence, and mission continuity, so modernization does not come at the cost of operations, security, or readiness.

WHAT WE DO

Spry partners with federal organizations to modernize critical systems, secure complex environments, operationalize data for decision advantage, and build a workforce that can sustain the change. Our work draws on modern engineering and secure-by-design practices, Zero Trust and enterprise cybersecurity, AI/ML and automation, audit-ready financial operations, and human-centered training. Scalable frameworks and proprietary tools keep cost down and shorten time to value. Spry supports Federal Civilian agencies across financial management, citizen services, public safety, transportation, energy, agriculture, and science; Defense agencies across enterprise resource planning, cyber operations, command and control, logistics, and technology modernization; and National Security and Intelligence agencies across threat intelligence, secure systems integration, and analytics.

CAPABILITY AREAS

DEVSECOPS AND AGILE DELIVERY

Agile and SAFe transformation, CI/CD pipeline engineering, secure software development, cloud-native modernization, Infrastructure-as-Code, and continuous testing.

STRATEGIC OPERATIONS AND PROGRAM MANAGEMENT

PMO design and operations, program governance and performance analytics, PPBE and investment management, business operations and stakeholder engagement, risk management, and acquisition support.

CLOUD, INFORMATION TECHNOLOGY INFRASTRUCTURE, AND SYSTEM ADMINISTRATION

Cloud migration and optimization (AWS, Azure, hybrid), network and storage administration, ITSM and service desk modernization, end-user and device management, observability, and platform engineering.

CYBERSECURITY AND RISK MANAGEMENT

Zero Trust, RMF and continuous ATO, threat detection and vulnerability management, ICAM, SOC operations and incident response, and cyber risk analytics.

INTELLIGENCE AND ANALYTICAL SUPPORT

All-source analysis (OSINT, HUMINT, SIGINT, GEOINT), data exploitation and mission analytics, operations center and watchlisting, insider threat and identity management, screening and biometrics, and classified environment support.

Why Agencies Choose Spry

One delivery model. A method proven on one program carries to the next instead of being rebuilt. Federal Civilian, Defense, and National Security run the same way.

Cleared, stable teams. Top Secret Facility Clearance, 80%+ cleared Secret or higher, a 94% offer acceptance rate, and 42 days from requisition to a cleared start. The team that wins the work performs it.

Evidence, not assertions. Exceptional CPARS ratings at DOT FRA, clean audit opinions, ATOs in under six months, 95% on-time delivery, and an 80% cut in high vulnerabilities. We document what the work produced.

Proof Points

- DevSecOps and Agile Delivery. Ran delivery for USDA Integrated Acquisition System — 5,000 users, \$6.3B in annual obligations, 20+ annual production releases across 15+ efforts at roughly 95% on-time sprint delivery.
- Strategic Operations and Program Management. Supported the Marine Corps in achieving clean audit opinions FY23–FY25, a first for any DoD Service, and deployed RPA for contract closeout saving more than \$3M and 5,000+ labor hours.
- Cloud, IT Infrastructure, and System Administration. Migrated mission applications to AWS Commercial Cloud Services and ran Tier 1–3 operations for an enterprise environment serving 30,000+ Intelligence Community users worldwide.
- Cybersecurity and Risk Management. ATO approvals in under six months across law enforcement, Intelligence, DoD, and Federal Civilian environments; cyber governance across 1,200+ systems and a ~\$4B IT portfolio; A&A spanning 40 systems and 15 agencies under the DOI ISSLoB.
- Intelligence and Analytical Support. TS/SCI cleared analysts running name-based checks against U.S. intelligence holdings at a proprietary DOJ enterprise vetting center, sustaining at or above expected volumes and growing workshare by four cleared FTEs.

Spry at a Glance

- Minority-Owned Small Business, founded 2001, headquartered in McLean, Virginia
- Top Secret Facility Clearance; 80%+ of personnel cleared Secret or higher
- ISO 9001:2015; ISO/IEC 20000-1:2018; ISO/IEC 27001:2022
- CMMI Level 3 (Services)

Contract Vehicles

- GSA OASIS+, Technical & Engineering Domain
- GSA MAS, SINs 54151S, 54151HACS, 518210C, 611430, 511210, and OLM/Ancillary Services
- Department of the Navy SeaPort-NxG
- DIA SITE III
- MDA SHIELD
- Two proprietary Department of Justice Customer Vehicles

Spry Foundry

Spry packages its innovation work into three delivery tracks.

- **Mission Accelerators.** Reusable assets that speed delivery on work already underway, including frameworks, data pipelines, templates, and reference architectures.
- **Product Ventures.** Repeatable offerings packaged and priced for more than one customer, such as licensable tools, hosted services, and productized solutions.
- **Research and Prototypes.** Early work on emerging mission technologies, producing prototypes, demonstrations, white papers, and SBIR/STTR submissions.

Foundry focus areas draw on where Spry already has mission credibility: AI decision support, continuous compliance and threat detection, audit readiness tooling, mission analytics, cloud landing zones, and workflow automation.

NAICS Codes

- 518210 – Data Processing, Hosting, and Related Services
- 511210 – Software Publishers
- 541511 – Custom Computer Programming Services
- 541512 – Computer Systems Design Services
- 541513 – Computer Facilities Management Services
- 541519 – Other Computer Related Services
